EXCEPTION FLOW DOCUMENT

Use Case: UC-03 – Enter Parking Facility

Exception Flow: Invalid or Unrecognized Vehicle Number Plate

4a. Invalid or Unrecognized Vehicle Number Plate

- The gate camera captures the vehicle number plate.
- The system attempts to validate the captured number plate against an active parking reservation.
- The system detects that the number plate is invalid, unrecognized, or does not match an active reservation.
- The system denies vehicle entry.
- The system displays an **"Invalid or Unauthorized Vehicle"** message.
- The system records the failed validation attempt.
- The Parking Warden is alerted to verify the vehicle manually.
- The exception flow ends.

Expected Outcome

The unauthorized vehicle is not allowed to enter, the failed validation is recorded, and the Parking Warden is notified for manual verification.
